Short and Sweet - Innovations in Biomethane Production at Small to Medium Scale

Dear Biogas / Biomethane Stakeholder,

with this newsletter, we would like to give you an update on the following subjects:

Technical workshop on innovative biogas / biomethane production in Leipzig

End of March, about 30 stakeholders met for an intensive knowledge transfer regarding promising technologies in the sector substrate pre-treatment, innovative digestion and biogas upgrading. If you have not been able to join, **you can now [download the presentations](#) from our project website**. If you have any questions or interest to get in touch with the technology developers, you can always contact us for assistance.

Meet us!

We will participate at different European conferences, where we will present our project and more details about technology solutions for a cost efficient and economically viable biomethane production.

We would be happy to meet you and to discuss new project concepts or on possibilities on how to join the "Biomethane Map".

You can find us at:

REGATEC, 22-23 May 2017 in Verona, Italy

Erik Fischer from DBFZ will attend this year's REGATEC conference. You are welcome to contact him for a meeting or to take part in his poster presentation.

EUBCE, 12-15 June 2017 in Stockholm, Sweden

Kathrin Bienert from DBFZ will present technology innovations along the biomethane supply chain on 15th June in the session "**Processes for Biomethane Production**" (Session code: 3DO.7)

New funding opportunity

The European Union will open a new call with the topic “Demonstrating of the most promising advanced biofuel pathways” on 11th May 2017. More details about this call can be found here: <https://ec.europa.eu/research/participants/portal/desktop/en/opportunities/h2020/topics/lce-19-2016-2017.html>

The Record Biomap project partners may support you in the development of a new project concept. You can contact us any time at info@biomethane-map.eu

Publications about promising biogas / biomethane technologies

You can find the latest publications on our website: www.biomethane-map.eu → [results](#)

Furthermore, we would like to highlight that the (German) report with results from the finalized “SE.Biomethane” project has been published. You can find the link to the reports here: <https://biomethane-map.eu/projects.7.0.html>

News from the “Biomethane Map”

By now, our interactive map contains 48 stakeholder profiles from European technology developers and 29 technology descriptions of innovative solutions for a small and medium scale biomethane production.

The map entries can be assorted according to your interests in the different technology pathways, e.g. substrate pre-treatment, digestion and gas upgrading. If you are interesting in new project concepts, you can use the Biomethane Map to find the right stakeholders or contact us at info@biomethane-map.eu.

Enjoy your spring time!

With best regards,

Record Biomap Project Team!
